DIN EN ISO 14001 : 2015

TENTE GOES GREEN

The protection and preservation of a healthy environment are among our priorities. Therefore, TENTE-ROLLEN has voluntarily dedicated itself the international DIN EN ISO 14001 standard in 2009.

Focus of the ISO 14001 is a process of continual improvement with regard to managing the environment. Standardised criteria are the basis for achieving the goals.

TENTE has an operational environmental policy which specifies environmental objectives, and has developed a corresponding management system. Continuous improvement is achieved through regular review of the stated environmental goals and the environmental management system.

OUR GOALS

- Strengthen and encourage environmentally conscious behaviour of our employees
- Minimise energy and raw material use
- Optimize the use of raw materials commodity
- Prevention or minimisation of emissions through the use of state of the art technology
- Environmental and resource protection training
- Development of new products with environmental protection in mind
- Reduction of packaging materials

With our responsibility for the environment, the future, as well as for our employees, we do not just meet the extensive statutory and regulatory requirements of REACH, but also more stringent directives and recommendations, such as PAHs and RoHS.

REACH

REACH is the European Community Regulation on chemicals and their safe use. It deals with the registration, evaluation, authorisation and restriction of chemical substances. We ensure that our products do not contain any banned substances and are not subject to restrictions.

PAHs

PAHs are polycyclic aromatic hydrocarbons and are considered as carcinogenic. The German Federal Institute for Risk Assessment (BfR) has established limits for PAHs. All our products are classified as category 3 products.

RoHS

We are in compliance with directive 2015 863 EU that is restricting the usage of substances like Lead, Mercury, Cadmium, Cr(VI), PBB, PBDE (including the prohibition of DecaBDE, as well as DEHP, BBP, DBP and DIBP) in electrical and electronic equipment.

What we do today for tomorrow:

TENTE operates responsibly, proactively and sustainably.
